New Year. New Courses. New Momentum.

A new year brings new courses — and a fresh boost of momentum to keep learning moving forward. Explore what's new in our catalogue:

New Course
CAPI - Bulk STEX

Enroll now

Developed for learners seeking a clear and structured, in-depth exploration of CAPI's Bulk STEX API and STEX Process APIs, where you'll learn the principles and practices of bulk STEX order creation and order pooling in ACP, along with their strategic advantages and implementation through CAPI. The course includes self-study videos on each topic and an instructor-led virtual class that gives you hands-on experience using the APIs.

New Course
Delta - Output Management Customization

Enroll now

Aimed at customization specialists working with Avaloq's new output solution. Gain a clear understanding of Avaloq's client-output strategy while implementing a new mailing product, exploring the architecture of the Document Hub and Inspire Flex, and learning their functional coverage. The course also guides participants through configuring and deploying the required components to ACPR, including key prerequisites and essential operational aspects.

New Course
### ABR/S Customization Principles

Enroll now

Designed for technical Business Analysts seeking a solid foundation in customizing the Avaloq Core Platform (ACP). Learn how business requirements are translated into effective configurations and understand how these choices shape processes and system behaviour.

BEG Studio now included in BEG course

The app let's you enter, validate, and save GraphQL stream tasks with DSL and SPEL filters, use a built-in sandbox to test JSLT transformation scripts with JSON data, deploy tasks at the click of a button, and monitor Kubernetes logs and events in real time. There's even a set of pre-built stream tasks you can use or adapt for your own requirements.
