Software partnership connects ACTICO Decision Management with the Avaloq Banking Suite.

Avaloq Business Rules Standard Adapter

Model business rules in ACTICO Decision Management and execute them in the Avaloq Banking Suite.

avaloq

essential for banking

Experience new Possibilities for flexible Rules Management in the Avalog Banking Suite.

Avaloq and ACTICO have signed a software partnership. The result of the joint development is the Avaloq Business Rules Standard Adapter. It enables banks to load business rules which have been modeled in ACTICO Decision Management into the Avaloq Banking Suite and to execute them there.

The Joint Offering at a Glance:

- ACTICO Business Rules Management to model business rules graphically.
- Avaloq Business Rules Standard Adapter to transfer these rules into the Avaloq Banking Suite.
- The intuitive modeling of rules is particularly interesting for business departments. It ensures maximum transparency of complex rules and their dependencies, e.g. in the regulatory domain.
- The first deployment scenario for the adapter currently being implemented with a pilot customer is the Investment Suitability Framework in the compliance department. As a result, the financial institution ensures compliance with the requirements of the legislators concerning investor protection and suitability.
- In the near future, further scenarios with the standard adapter are being prepared such as in the area of Client Life Cycle and Tax.

Experience how you can use the adapter to model rules and transfer them into the Avaloq Banking Suite. www.actico.com/avaloq-modeling

Your Benefits:

Tested Interaction between Business Rules and Avaloq Core Banking System Thanks to the partnership, the behavior of the Investment Suitability Framework can be perfectly managed using ACTICO graphical rule modeling.

Transparent and revision-proof Rules

The graphical rules are readable by the business department. Rules are managed along with their change history, so changes always remain transparent.

Manage MiFID II and FIDLEG Projects

Are you preparing a MiFID II or FIDLEG project? Then the adapter brings significantly more transparency over the market conduct rules, that financial service providers have to comply with, when dealing with their clients. Here Avaloq's Investment Suitability Framework is the focus of attention. ACTICO Decision Management works reliably with this framework via standard adapter.
