2023 is less than a hundred days away!

Some of you are clearly early planners, because our January, February and March ACCP courses are fully booked! On the other hand, if you need accreditation points, there are a lot of options to choose from. Check them out below.

Academy courses on Release 5.4

Did you know that some of our courses are now delivered on Release 5.4? Yes, we are continually upgrading our education environment, so you can work with the latest ACP release. Neat, right?

Responsive Forms / Webforms
03 November 2022
This course is designed for customisation specialists working with graphical interfaces. It will introduce you to the functionality and customisation of responsive forms and some closely-related topics, such as presentatior types. To reinforce your learning experience, this course provides several demonstrations and practical examples.

ACCP with Major in Core Technologies
07 November 2022 to 30 November 2022
The highly customizable and flexible Avaloq Banking Suite can meet the needs of any banking and investment business. The aim of the course is to establish a fundamental understanding of the capabilities for customizing the Avaloq Core Platform when addressing business-specific requirements. This knowledge is essential for anyone working in Avaloq implementation projects.

Web Banking App Development
16 November 2022 to 17 November 2022
This two-day course equips you with the programming knowledge and skills needed to build Avaloq Web Banking Saxo Bank® applications using Agile, Material Design and Avaloq Web Banking components.

GIM Cross-functional overview incl. ACP exam (GIMC)
16 November 2022
This course provides deeper insight into the GIM framework and elaborates in a cross-functional way on the support provided for implementation projects. It covers all project types supported by GIM and illustrates the prescribed methods with a new implementation project and an integration project with a continuous storyline.
