That’s a wrap for 2021!

Well, this year flew by so quickly but looking back, we made the most of it in this newsletter, I highlight some facts and figures to wrap up the year.

You invested in growing your skills in the latest technology and products of Avaloq. The average number of trainees per month was 14% more than last year.¹ We hope that you’ve adapted well to learning from home, although we have to admit that we also miss the in-class sessions.

In January, our resolution was to keep on learning – which we achieved! The world of passmaturation was a little intimidating at first, but we enjoyed the challenge and appreciated the support of our subject matter experts, and it was a pleasure to share the outcome with you. Although it’s time for us but were learning more about it and are now looking forward to transforming the ACCP using its customization framework.

I’d like to thank the whole Academy team for such brilliant work in providing you with the best possible learning experience. Let’s do it all again and what a great pleasure to work with such remarkable people!

And to you, thanks for sharing this year with us. Have a lovely holiday ahead and recharge your batteries for new challenges next year!

Cheers,
Jane Witty

Did you know?

Decommissioning Delta 2019H1

Yes, we’re decommissioning Automated Personal Data Management (APDM), but we’re still going to offer it as an elective course, so don’t worry! We’ll update some of the content and enhance it with interactive videos. This revised course is for people who haven’t attended the Delta 2019H1 course or who want to update their knowledge.

New ACCP slot in Q1 2022

We understand that new colleagues will start in Q1, so we’ve added a new slot:

31 January 2021 – 23 February 2021
