

Avaloq Partners

Technology Partners

We work with our technology partners to integrate Avaloq solutions within our customers' system environments in a way that ensures optimum performance. Stability and innovation are central to these long-term partnerships so that we can keep our customers' technology up-to-date and maximize their benefit on a solid foundation.

Technology Partners

Ergon Informatik AG
Hewlett Packard Enterprise
IBM
Liferay
Microsoft
Oracle Software
Red Hat Inc.

Software Partners

To ensure that the Avaloq Banking Suite operates reliably with the integrated third-party systems, Avaloq enters into partnerships with specialised, qualified providers of third-party systems. The overriding objective of these partnerships is to achieve a smooth interaction between the systems. Avaloq has developed three models for this:

- **Standard Adapter** – Avaloq offers the adapter as an integrated component of Avaloq solutions and maintains a software partnership with the third-party system provider.
- **Certified Adapter** – The third-party system provider owns the Avaloq-certified adapter and offers it in the scope of a software partnership.
- **Project Adapter** – The customer or a third party owns the project adapter.

Standard Adapters

Partner	Solution	Functionality
D+H	Global Messaging Plus (GMP) Global Compliance Plus (GCoP) TRX	Connection to clearing and settlement systems (SWIFT, SIC4, euroSIC, SECOM, ...)
